v.	)	Civil Action No. 6:20-cv-309- ADA
	)	
EXPEDIA, INC. AND TRIVAGO N.V.,	)	JURY TRIAL DEMANDED
Defendant.	)	
_____	)	

**AMENDED INFRINGEMENT CONTENTIONS**

Pursuant to Paragraph 2 of the Court’s *ORDER GOVERNING PROCEEDINGS – PATENT CASE* (Dkt. 14), Plaintiff Corrino Holdings LLC (“Corrino”), hereby makes the following Preliminary Disclosure of Infringement Contentions (“PICs”) to Expedia, Inc. and trivago N.V. (collectively “Expedia”).

Corrino’s PICs are based on Corrino’s current interpretation of the asserted patents and on publicly available information describing Expedia’s proprietary products, systems, and relationships. Corrino reserves the right to amend its PICs and asserted claims based on information Corrino obtains through discovery and otherwise as this case progresses. Corrino reserves the right to amend its infringement contentions responsive to claim construction proceedings and the Court’s claim construction rulings or any other relevant rulings. Corrino reserves the right to amend its infringement contentions and asserted claims based on any proceedings before the United States Patent and Trademark Office regarding Corrino’s patents, including the patents-in-suit.

Moreover, the charts and Accused Instrumentalities attached hereto are not intended to cover duplicative instrumentalities or products, *i.e.*, those Expedia instrumentalities and products that have the same structure, function and operation as the charts and Accused Instrumentalities identified herein. Corrino will supplement its PICs as to such duplicative instrumentalities or products to the extent required by the Court.

### **Asserted Patents and Infringement Charts**

Corrino provides the attached claim charts which identify where to find each element of each asserted claim within the Accused Instrumentalities. (**Exhibits A-G**). Corrino identifies these asserted claims based on its current and preliminary understanding and reserves the right to supplement its identification as discovery proceeds, including identifying additional claims. These charts serve a notice function and are not required to and therefore do not present every possible permutation or theory of Corrino's case. Corrino's PICs focus on notice of the underlying direct infringement and are not provided to and should not be read to explain such issues as joint liability, mastermind, or indirect infringement, for example.

Corrino presently contends that Expedia's Accused Instrumentalities literally infringe the Asserted Patents as more specifically explained in the attached charts. Corrino may further assert infringement under the doctrine of equivalents as identified in the attached charts, to the extent that the difference between any component of any product and any step of any service or any claim element is insubstantial.

- U.S. Patent No. 6,741,188 ("the '188 Patent"), *see* Ex. A.
- U.S. Patent No. 7,716,149 ("the '149 Patent"), *see* Ex. B.
- U.S. Patent No. 7,843,332 ("the '332 Patent"), *see* Ex. C.
- U.S. Patent No. 7,847,685 ("the '685 Patent"), *see* Ex. D.

- U.S. Patent No. 7,958,104 (“the ’104 Patent”), *see* Ex. E.
- U.S. Patent No. 9,152,734 (“the ’734 Patent”), *see* Ex. F.
- U.S. Patent No. 9,262,533 (“the ’533 Patent”), *see* Ex. G.

### **Accused Instrumentalities**

Based on the information currently available, Corrino identifies the following instrumentalities, including all reasonably similar variants or improvements, as the accused instrumentalities: Expedia’s websites and mobile apps for each of the Expedia Brands and Subsidiaries, specifically, the [www.expedia.com](http://www.expedia.com) website and related mobile application, the [www.cheaptickets.com](http://www.cheaptickets.com) website and related mobile application, the [www.hotels.com](http://www.hotels.com) website and related mobile application, the [www.orbitz.com](http://www.orbitz.com) website and related mobile application, the [www.travelocity.com](http://www.travelocity.com) website and related mobile application, the [www.trivago.com](http://www.trivago.com) website and related mobile application, the [www.HomeAway.com](http://www.HomeAway.com) website and related mobile application, the [www.Vrbo.com](http://www.Vrbo.com) website and related mobile application, and all other substantially similar products and services (collectively the “Accused Products”). The term “Accused Products” includes the associated computer system, software, hardware, processes, and methods related thereto. As used herein, each website and related mobile application is a “Platform,” each Platform is an “Accused Product,” and the Accused Products are referred to collectively as “Accused Instrumentalities.”

Corrino identifies these Accused Instrumentalities based on its preliminary understanding of information currently available to Corrino. Expedia has not to date provided any relevant technical discovery, and Corrino reserves the right to supplement its identification as discovery proceeds, including identifying additional instrumentalities.

### **Document Production Accompanying Disclosure**

Corrino has provided a copy of the file history of each Asserted Patent. Based on the information currently available, Corrino is currently relying on the earliest filing date of an application, including any provisional application, from which the Asserted Patents issued. As a result, Corrino is not producing documents concerning the conception, reduction to practice, design, and development of each claimed invention which were created on or before the earliest application date for each respective Asserted Patent. Corrino will supplement its response to the extent it subsequently alleges a priority date other than that of the earliest application of each Asserted Patent.

### **File Histories**

Corrino has produced the file history for each Asserted Patent.

Date: 3 August 2021

**EXHIBIT F**

**Preliminary Infringement Contentions for U.S. Patent 9,152,734**

**Title:** SYSTEMS AND METHODS FOR IDENTIFYING INTERSECTIONS USING CONTENT METADATA  
**Priority Date:** at least May 24, 2010, filing date of Provisional Appl. No. 61/347,815  
**Filing Date:** May 24, 2011  
**Inventors:** Peter Rinearson, Kristofor Selden, Michael Flashman  
**Abstract:** User-submitted content (e.g., stories) may be associated with descriptive metadata (intersection meta data), such as a timeframe, location, tags, and so on. The user-submitted content may be browsed and/or searched using the descriptive metadata. Intersection criteria comprising a prevailing timeframe, a location, and/or other metadata criteria may be used to identify an intersection space comprising one or more stories. The stories may be ordered according to relative importance, which may be determined (at least in part) by comparing story metadata to the intersection criteria.

All allegations of Plaintiff's operative Complaint, including those filed hereafter, are incorporated herein by reference. Plaintiff reserves the right to revise these contentions, including as discovery in the case progresses and in view of the Court's final claim construction in this action or any other relevant rulings or information becomes available. The contentions are provided as required to provide general notice of the asserted claims and infringing features of the accused instrumentalities, and are not an exhaustive list of all proof thereof to be marshalled at trial.

**Accused Instrumentalities:** Based on the information currently available, Corrino identifies the following instrumentalities, including all reasonably similar variants or improvements, as the accused instrumentalities: Expedia's websites and mobile apps for each of the Expedia Brands and Subsidiaries, specifically, the [www.expedia.com](http://www.expedia.com) website and related mobile application, the [www.cheaptickets.com](http://www.cheaptickets.com) website and related mobile application, the [www.hotels.com](http://www.hotels.com) website and related mobile application, the [www.orbitz.com](http://www.orbitz.com) website and related mobile application, the [www.travelocity.com](http://www.travelocity.com) website and related mobile application, the [www.trivago.com](http://www.trivago.com) website and related mobile application, the [www.HomeAway.com](http://www.HomeAway.com) website and related mobile application, the [www.Vrbo.com](http://www.Vrbo.com) website and related mobile application, and all other substantially similar products and services. Although the exemplary accused instrumentalities charted below are Expedia, CheapTickets, and Travelocity, the remaining Accused Instrumentalities have substantially the same if not identical structure, function and operation as the Accused Instrumentalities charted below and therefore also infringe for the same reasons demonstrated in the charts below.

<p>receiving a query comprising an intersection criteria, the intersection criteria comprising a location and a timeframe of interest;</p>	<p>CheapTickets enables users to enter search query for available flight options from the preferred departure airports to destination airports. Further, the search query comprises departure or arrival airport (“location of interest”) and departure or arrival time (“timeframe of interest”). As shown in the exemplary case below, the user searches for departure flights from LGA (New York) within timeframe of Morning (5.00 AM to 11.59 AM).</p>  <p>The screenshot shows the CheapTickets flight search interface. At the top, there are input fields for departure and arrival locations, dates, and a search button. The departure location is set to 'New York, United States of A' and the arrival location is 'Washington, DC, United St'. The dates are '03/18/2019' and '03/23/2019'. Below these fields, there are filters for 'Nearby airports', 'Traveler', and 'All Airlines, Economy / Coach'. The main section is titled 'Select your departure to Washington Mon, Mar 18'. It shows a list of flight options with columns for 'Stops', 'From', 'To', 'Time', 'Price', and 'Select'. The 'Stops' column has filters for 'Nonstop (54)' and '1 Stop (25)'. The 'From' column has filters for 'American Airlines (33)', 'Delta (23)', 'United (17)', 'JetBlue Airways (5)', and 'Spirit Airlines (1)'. The 'To' column has filters for 'Morning (5:00am - 11:59am)', 'Afternoon (12:00pm - 5:59pm)', and 'Evening (6:00pm - 11:59pm)'. The 'Price' column has filters for 'Morning (5:00am - 11:59am)', 'Afternoon (12:00pm - 5:59pm)', and 'Evening (6:00pm - 11:59pm)'. The 'Select' column has filters for 'Morning (5:00am - 11:59am)', 'Afternoon (12:00pm - 5:59pm)', and 'Evening (6:00pm - 11:59pm)'. A callout box labeled 'Intersection criteria' points to the 'Morning (5:00am - 11:59am)' filter in the 'Stops' column and the 'LGA (New York) (35)' filter in the 'From' column.</p>

<p>generating an intersection space comprising one or more stories matching the location and the timeframe of the query, said generating comprising:</p> <p>accessing a plurality of stories stored on a non-transitory computer-readable storage medium, each story submitted by a user and comprising one or more content items and having respective intersection metadata, the intersection metadata of each story comprising a location and a timeframe pertaining to the story;</p>	<p>CheapTickets creates a search result page (“intersection space”) for displaying a list of identified records (such as flights from the preferred airport within selected timeframe) as search results. CheapTickets looks for desired search results (“stories”) with information that matches the search query (“intersection metadata”) in its database (“stored on a computer-readable storage”). As shown in the exemplary case below, the search results are displayed to the user that match the user query i.e. search term, location and timeframe.</p>

Claim Language	Exemplary Accused Instrumentality
<p>selecting stories for inclusion in the intersection space that have intersection metadata corresponding to the location and the timeframe of the intersection criteria; and</p>	 <p>The screenshot shows the Cheaptickets website interface. At the top, the search parameters are: New York, United States of A to Washington, DC, United St, dated 03/18/2019 to 03/23/2019. The search results are for flights to Washington on Monday, Mar 18. The filters selected are: Departure time - New York: Morning (5:00am - 11:59am) and Departure airports: LGA (New York) (35). The results show several flight options, with the first two highlighted by a red box. A callout box points to the first two results, stating "An intersection space".</p> <p>Screenshots taken from hands on testing of Cheaptickets website</p> <p>The flights departure location and time as mentioned in the filters are selected for displaying results. In the exemplary case below, the flight departing from location 'New York' and departure time between Morning 5.00 AM to 11.59 AM are selected as "intersection criteria" for displaying the desired results.</p>

Claim Language	Exemplary Accused Instrumentality
	 <p>The screenshot shows the CheapTickets website interface for a flight search from New York to Washington, DC. The search parameters are set for a roundtrip on 03/18/2019 to 03/23/2019. The results are sorted by price (lowest). The left sidebar shows filters for departure time (Morning 5:00am - 11:59am) and departure airports (LGA New York). The main results table shows several flight options, including United, American Airlines, and JetBlue. A red box highlights the 'Intersection' area where flight results are displayed, and another red box highlights the 'Intersection criteria' section on the left. A callout box labeled 'Intersection' points to the flight results table.</p>
<p>filtering the stories selected for inclusion in the intersection space so that each remaining story is associated with an indication</p>	<p>Screenshots taken from hands on testing of CheapTickets website</p> <p>CheapTickets filters the stories selected for inclusion in the intersection space so that each remaining story is associated with an indication provided by one or more users. Specifically, CheapTickets filters the results associated with the different airlines (“more participants”) based</p>

<p>receiving a query comprising an intersection criteria, the intersection criteria comprising a location and a timeframe of interest;</p>	<p>Travelocity enables users to enter search query for available flight options from the preferred departure airports to destination airports. Further, the search query comprises departure or arrival airport (“location of interest”) and departure or arrival time (“timeframe of interest”). As shown in the exemplary case below, the user searches for flights from New York (LGA) within timeframe of Afternoon 12 PM to 5:59 PM.</p>  <p>The screenshot shows the Travelocity website interface for flight search. At the top, the origin is set to 'New York, United States of A' and the destination is 'Washington, DC, United St'. The date is '03/14/2019'. Below this, the search criteria are '2 Travelers, All Airlines, Economy / Coach'. The main section is titled 'Select your departure to Washington Thu, Mar 14'. It shows a list of flight options with columns for departure time, duration, stops, price, and a 'Select' button. A callout box labeled 'Intersection criteria' points to the 'Departure time' and 'Departure airports' filters on the left side of the page. The 'Departure time' filter is set to 'Afternoon (12:00pm - 5:59pm)' and the 'Departure airports' filter is set to 'LGA (New York) (17)'. The flight results show options from American Airlines, JetBlue Airways, and Delta, with prices ranging from \$448 to \$511.</p> <p>Screenshots taken from hands on testing of Travelocity website</p>

#### Travelocity Terms of Use

#### How Our Sort Order is Determined

As a travelers shopping on our site, you have many options on to help you find the perfect hotel, flight, car rental, cruise or activity. The “sort” settings allow you to order search results to your preference, whether based on price, verified review score, or other criteria. The “filter” settings also allow you to include or exclude various options to suit their travel needs. If no options are selected, we will show a range of relevant options in the search results, based on the criteria outlined below:

Claim Language	Exemplary Accused Instrumentality
<p>calculating a relative importance of each story in the intersection space, wherein the relative importance of respective stories indicates a relative overlap between the timeframe of interest and a timeframe of the respective story; and</p>	<p><a href="https://www.travelocity.com/p/info-other/legal.htm">https://www.travelocity.com/p/info-other/legal.htm</a>.</p> <p>Travelocity provides search result based on the different sort orders such as by such as price, earliest arrival, earliest departure etc., that can be selected by the user. In the exemplary case below, in sorting based on earliest departure, American Airlines has been given a higher importance as compared to JetBlue Airways. All the stories in the results have overlapping timeframe between the timeframe selected by the user and departure time of each airline story in the search result.</p> <p><b>Travelocity Terms of Use</b></p> <p><b>How Our Sort Order is Determined</b></p> <p>As a travelers shopping on our site, you have many options on to help you find the perfect hotel, flight, car rental, cruise or activity. The "sort" settings allow you to order search results to your preference, whether based on price, verified review score, or other criteria. The "filter" settings also allow you to include or exclude various options to suit their travel needs. If no options are selected, we will show a range of relevant options in the search results, based on the criteria outlined below:</p> <p><a href="https://www.travelocity.com/p/info-other/legal.htm">https://www.travelocity.com/p/info-other/legal.htm</a>.</p>

<p>providing, for presentation on a display, the intersection space comprising indicators of one or more of the stories included in the intersection space in an order based on the relative importance of each</p>	<p>The identified search results (flights) are displayed to the user on the search result page with “indicators”. As mentioned in the description of the patent, an indicator can be a name or description about the contributor of the story (indicating the contributor of the story). Thus, in this case, the names of the airlines or airways listed in the search results are “indicators.”</p>
